### 4. Copy the Extracted folder and past in to This PC→Local disk C → Program Files

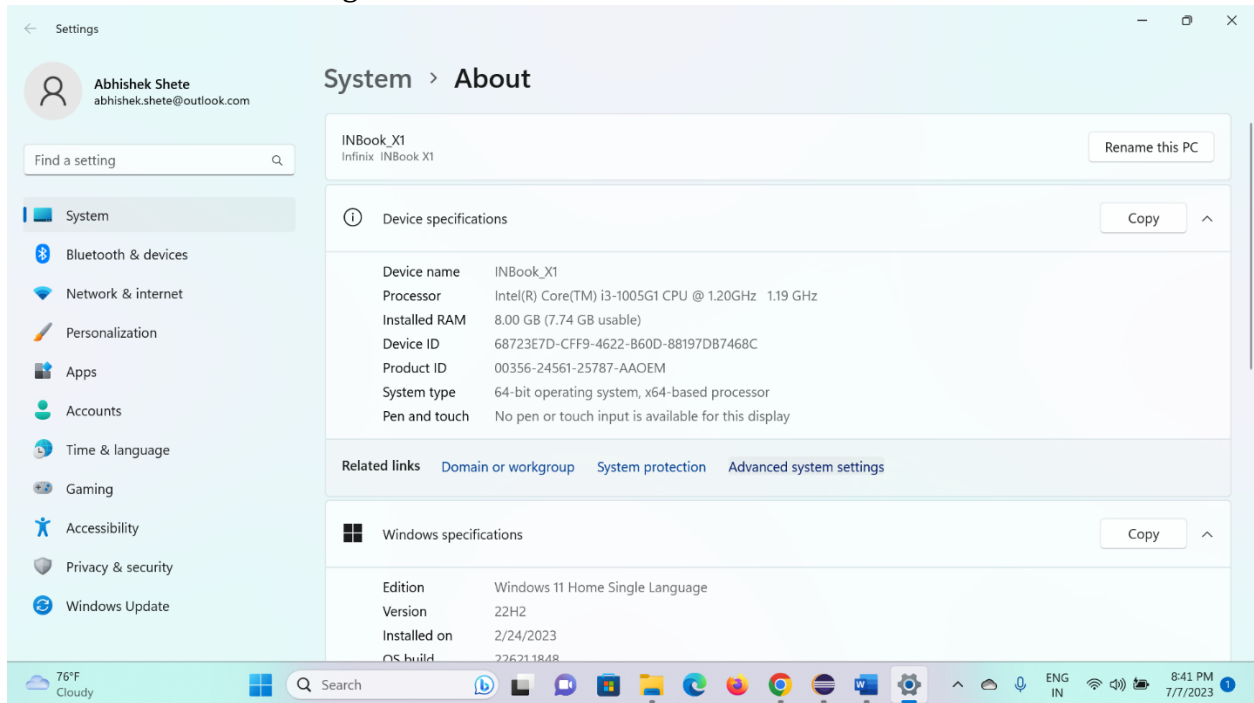

5. Click on that folder → Click on bin and copy the path

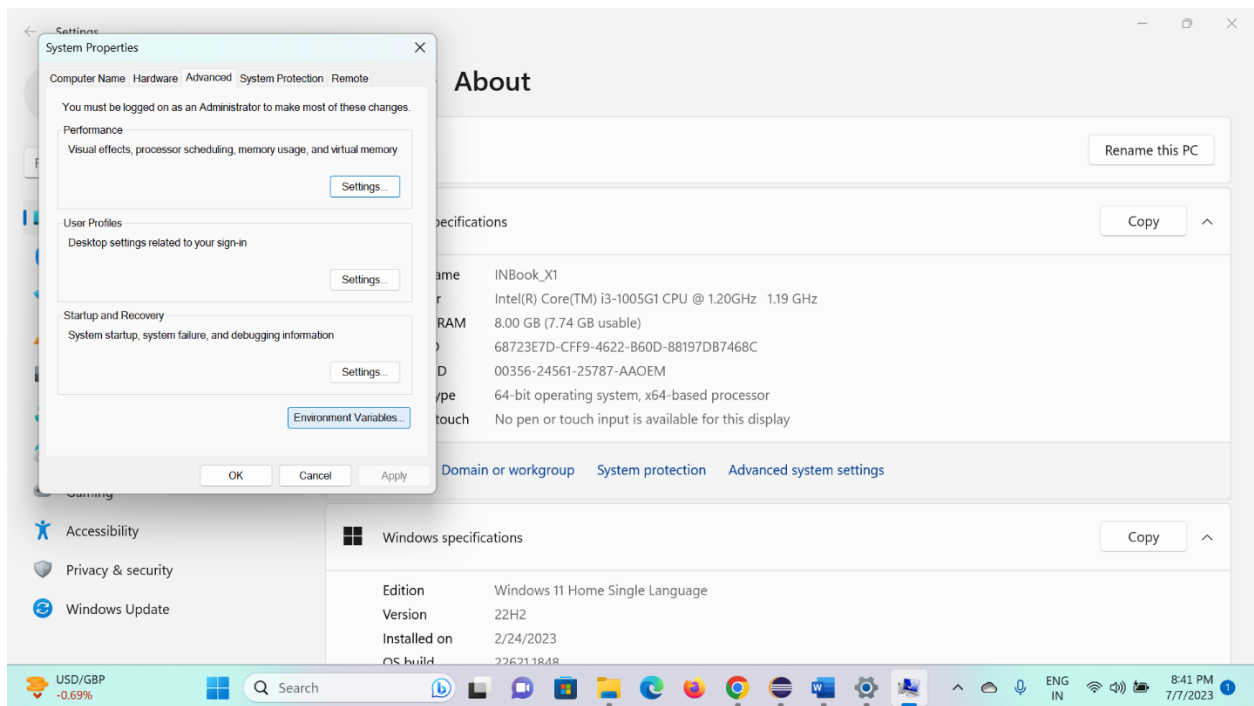

6. Right Click on This PC → Click on Properties

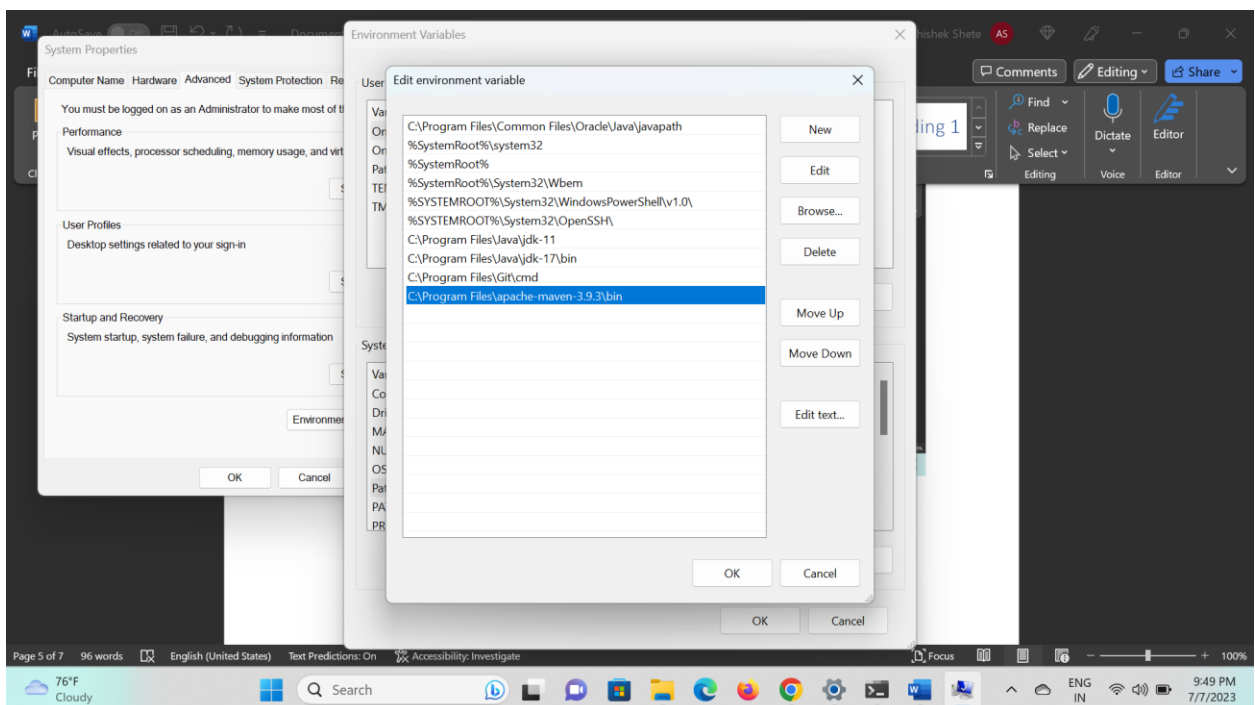

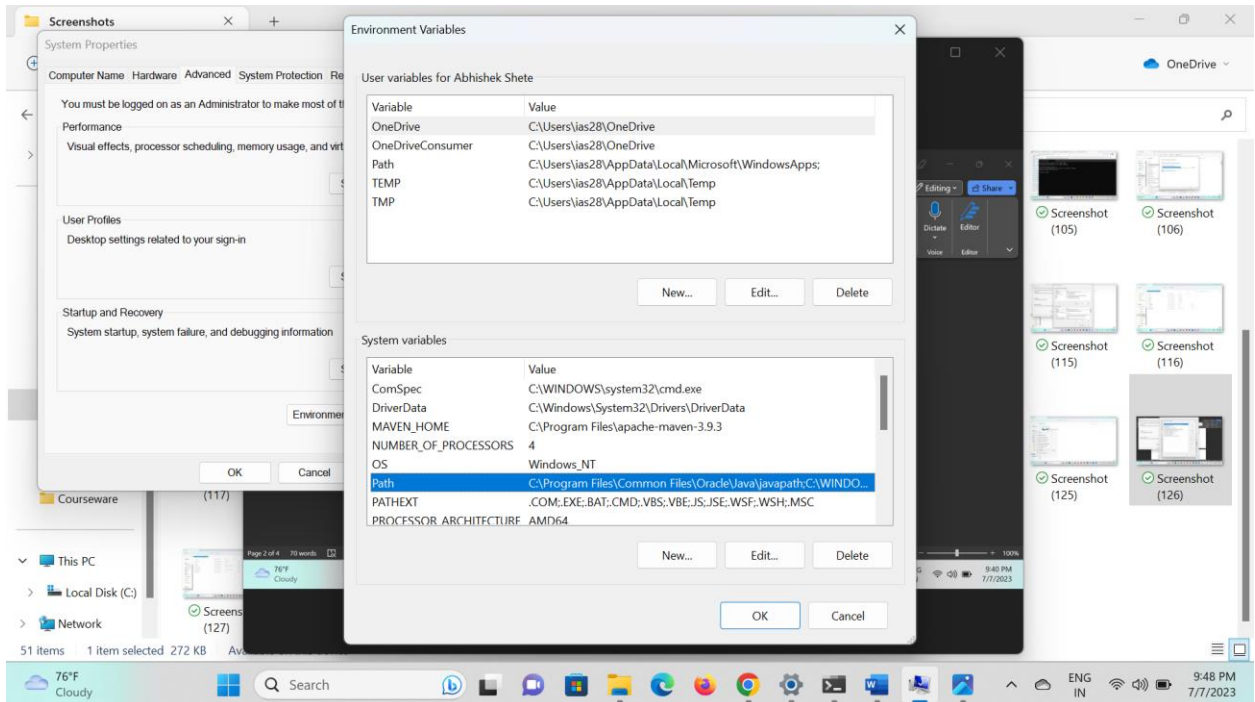

## 7. Click on Advanced Setting →

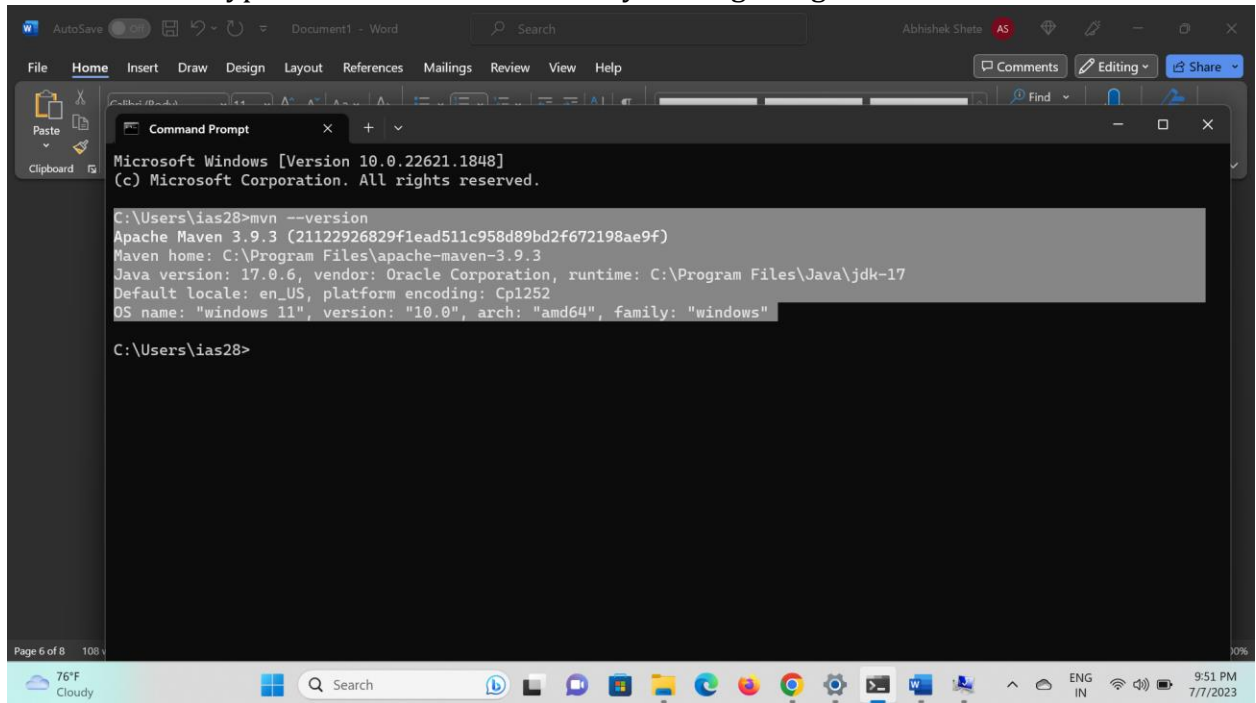

## 8. Click on Environment Variable →

9. Click on System variables → PATH → Click on Edit → Click on New → Paste Our Path here and click on ok

10. Go to CMD and type `mvn --version` check that you are getting maven version details

The screenshot shows a Windows Command Prompt window titled "Command Prompt" with the following output:

```
Microsoft Windows [Version 10.0.22621.1848]
(c) Microsoft Corporation. All rights reserved.

C:\Users\ias28>mvn --version
Apache Maven 3.9.3 (21122926829f1ead511c958d89bd2f672198ae9f)
Maven home: C:\Program Files\apache-maven-3.9.3
Java version: 17.0.6, vendor: Oracle Corporation, runtime: C:\Program Files\Java\jdk-17
Default locale: en_US, platform encoding: Cp1252
OS name: "windows 11", version: "10.0", arch: "amd64", family: "windows"

C:\Users\ias28>
```

The background of the Command Prompt window shows a Microsoft Word document titled "Document1 - Word" with the ribbon set to "Home". The taskbar at the bottom displays the system clock as 9:51 PM on 7/7/2023, along with weather information (76°F Cloudy) and various system icons.

11. You have successfully Installed mvn in your pc
